PROFESSIONAL SUMMARY

DevOps & MLOps Engineer enabling real-time AI optimization through robust infrastructure design. I streamline critical business processes by building modular backend architectures and automating model-serving pipelines (inference, versioning, autoscaling). Committed to operational excellence, I combine rigorous testing protocols with cloud-native orchestration to boost application credibility and minimize downtime. bridge the gap between high-performance backend services (Node.js, Python) and production operations by managing end-to-end CI/CD pipelines and Kubernetes environments.

WORK EXPERIENCE

Backend & MLOps/DevSecOps Engineer

Rida.Ai

Dec 2025 to Present

- Architect scalable AI-enabled backend systems & developing high-performance API services that integrate microservices with real-time AI/ML workflows.
- Orchestrate cloud-native infrastructure via Kubernetes and Terraform, implementing GPU autoscaling and containerized environments to support heavy AI computation and training workloads
- Engineer end-to-end MLOps pipelines for model serving (inference, versioning, canary deployments), utilizing automated monitoring to track model performance and ensure seamless production rollouts.

DevSecOps Engineer

United Overseas Bank

January 2023 to Dec 2025

- Automated CI/CD pipelines with Jenkins, and scripting solutions with Java and Python.
- Designed and implemented scalable low-code automation workflows using n8n and managed Windows server infrastructure
- Drove DevSecOps initiatives, leading DAST implementation and automation efforts across the entire application portfolio

PROJECTS

- [Bitbucket Code Doctor Prompt Template](#)
- n8n Automation
- [FoodPrint](#)

EDUCATIONAL BACKGROUND

National University of Singapore

Aug 2025 – Feb 2028

Master of Computing

Courses: Data Structure and Algorithms, Artificial Intelligence, Fundamentals of Data Analytics

Singapore University of Singapore

Jul 2019 – Jul 2022

Bachelor of Science in Logistics and Supply Chain

Management (Second Upper Class Honours)

Courses: Lean Six Sigma, Quality Management and Improvement, Supply Planning

LEADERSHIP & SOFT SKILLS

[Youth Corps Cluster Conferred Leader](#)
[Asian Undergraduate Summit Exco](#)
[SUSS AI SG Head of Publicity](#)

CERTIFICATIONS

CompTia Security+
DevSecOps Foundation
Google Cybersecurity Professional
JavaScript Framework with ReactJS (SF)
Machine Learning Operations Engineering on AWS
Python for Deep Learning Models and AI (SF)
SpringBoot Framework (SF)

ACHIEVEMENTS

1st Place for SoAI International AI Algo Trading Hackathon 2026
1st Runner-Up for UOB Group Banking Hackathon 2024
Awarded the Group Banking Technology 2025 Appreciation Award (For Due Diligence in Work)
